## Human S100A12

Human, recombinant protein expressed in *E. coli*.

Cat# CY-R2262-H

Amount: 100 µg (1.0 µg/µL)  
Lot:**Introduction:**

Members of the S100 protein family are low molecular mass acidic proteins characterized by cell-type-specific expression and the presence of 2 EF-hand calcium-binding domains. The calgranulins are S100 proteins that are expressed in neutrophils, and are abundant in infiltrating monocytes and granulocytes under conditions of chronic inflammation.

Hofmann et al. (1999) reported that RAGE is a central cell surface receptor for S100A12, which they referred to as EN-RAGE (Extracellular Newly identified RAGE-binding protein), and related members of the S100/calgranulin superfamily. Interaction of EN-RAGE (S100A12) with cellular RAGE on endothelium, mononuclear phagocytes, and lymphocytes triggered cellular activation, with generation of key proinflammatory mediators. In murine models, blockade of ENRAGE/RAGE quenched delayed-type hypersensitivity and inflammatory colitis by arresting activation of central signaling pathways and expression of inflammatory gene mediators.

S100A12 serum concentrations indicate neutrophil activation in JRA, cystic fibrosis, Kawasaki disease and Crohn's disease. Its function as a proinflammatory factor secreted by activated neutrophils makes this protein a potential target for future therapies.

**Product Description:**

Full length of human S100A12, containing N- and C- terminal His tag, expressed in *E. coli*. and purified by nickel-chelate-agarose chromatography.

**Gene Information:**

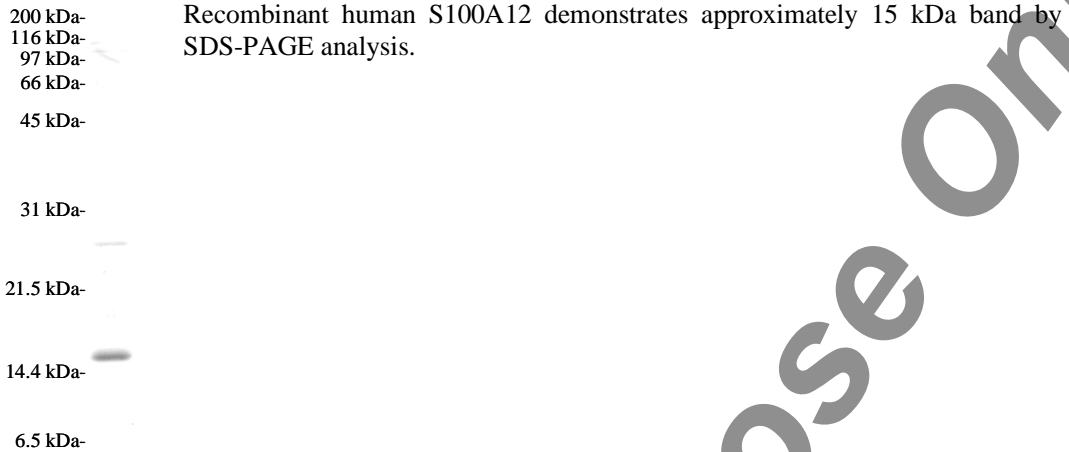

The gene accession number is NM\_005621.

**Gene Aliases:**

EN-RAGE, Calgranulin C, p6, CAAF1, CGRP, cornea-associated antigen

**Formulation:**

Recombinant human S100A12 is supplied frozen in phosphate buffered saline (PBS) containing 50 % glycerol.

**For Research Use Only, Not for use in diagnostic procedures****Molecular Weight:** 15 kDa**Storage:**

Store product at -70°C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, AVOID REPEATED HANDLING AND MULTIPLE FREEZE/THAW CYCLES.

**Stability:**

Unopened vial at -70 °C, for 1 year after delivery.
